

Social Welfare and Community Development

Cell

Vision

AIMT, through its CSR initiatives, will continue to enhance value creation in the society and in the community in which it operates, through its services, conduct & initiatives, so as to remote sustained growth for the society and community, in fulfilment of its role as a Socially Responsible Corporate, with environmental concern.

The mission of the Societal Welfare and Community Development cell, is to educate the future business leaders about how they can contribute towards the Environment and the Social Welfare. The cell serves as a vehicle to create awareness that the responsibility lies with each individual to 'Save the Earth' as well as be socially responsible. Students learn the concept of community service by working together to make a community a better place to live and they have fun as they explore their environment through recreational and Service projects in communities. The cell provides an avenue for students to acquire skills needed to identify, investigate, and experience the resolution of environmental and social welfare issues and problems.
